Air³ — Acoustics / Fire Safety / Ventilation / Lighting / Electrics

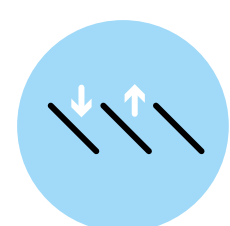

air³

Internationally patented opening
roof technology makes Orangebox
pods 'building independent', no need
to change existing sprinkler or air
conditioning systems.

No sprinkler required.

**"We knew that if we were able to redefine
what was meant by an internal room,
it would be a game changer."**

With new materials, a wide range of finishes and
the most compliant room system on the market,
Air³ is
the world's most complete pod

Flexibility

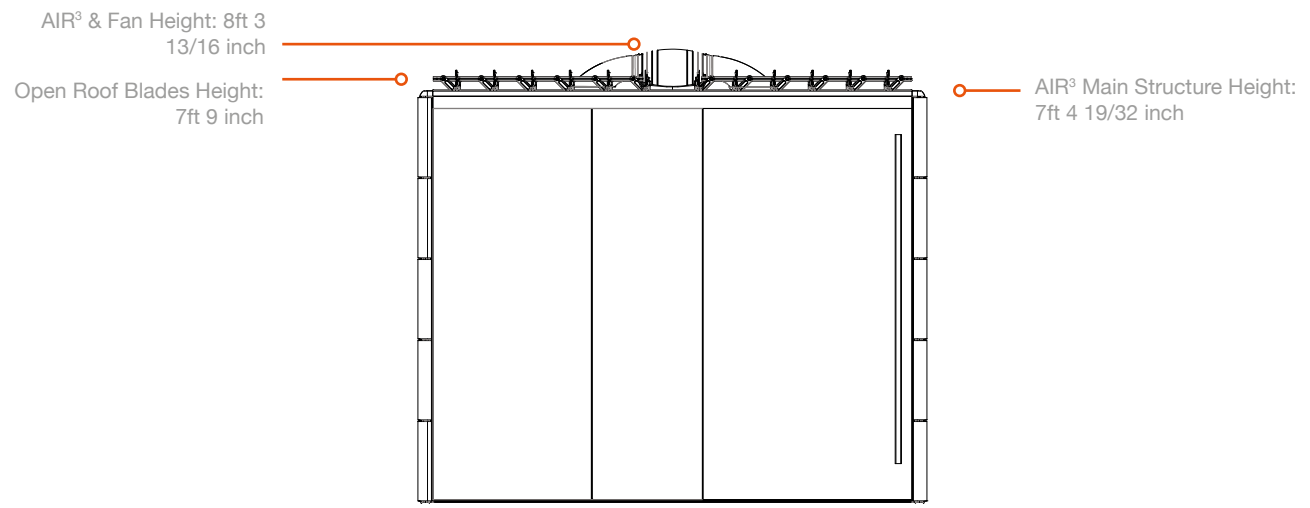

A free-standing modular system
that can easily be moved or
reconfigured to different sizes.

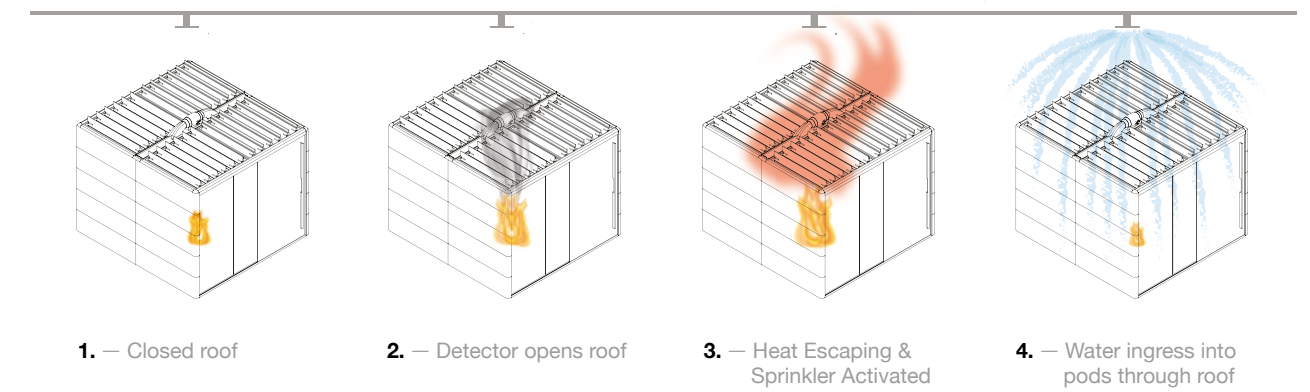

Roof System

Air³ offers a unique opening and closing roof, providing an effective solution for sprinklered buildings. During any life safety event, the roof will automatically fail-safe open, providing access for the building sprinklers.

Opening Roof

Opening Roof — In the event of a fire

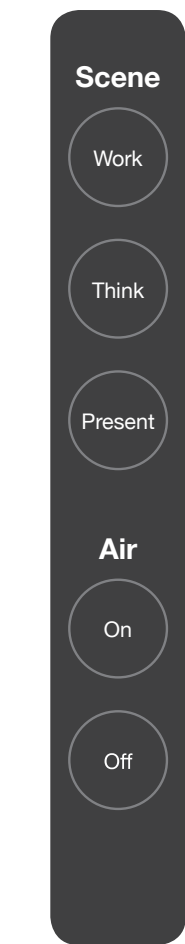

Aluminium Roof Panels provide:

- Enhanced acoustic performance up to 38dB
- Higher manufacturing quality
- Improved product robustness
- Easier to maintain and clean
- Wider regulatory compliance for global markets

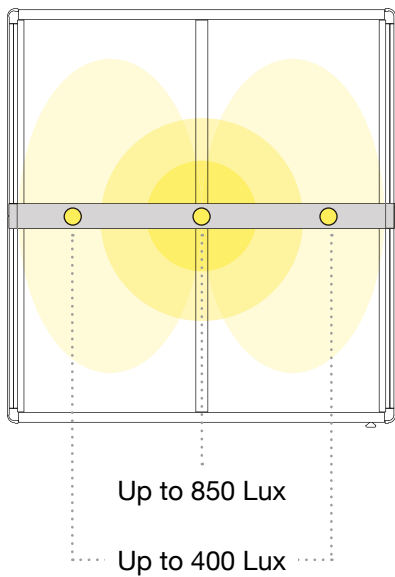

Control Panel

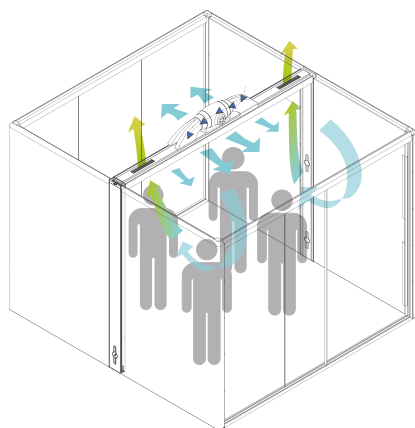

Control and Power panel

LED Lighting System

Air Circulation Fan

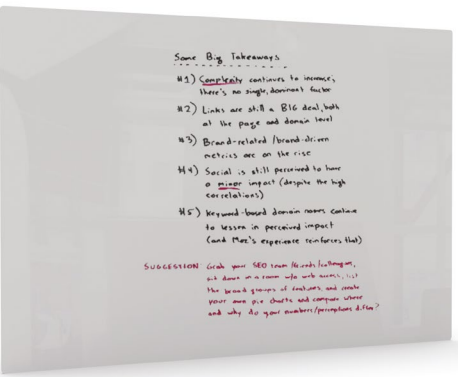

Accessories

Air³ can be customized with a range of fabric choices on upholstered panels.

Glass Magnetic Whiteboards

Whiteboards are positioned on layers 3 + 4 of the upholstery panels.

The whiteboards can only be mounted on the inside.

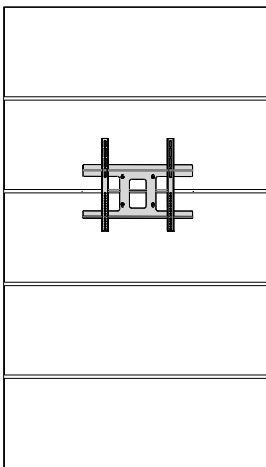

Whiteboards and monitor brackets can also be directly integrated into the Air³ Structure.
