

ALLT·TABLING

# It's vital we create meaningful destinations in the contemporary workplace.

With its statement shelf, size and stature, Allt is a significant presence within open-plan environments; a calm oasis in an otherwise distracting workplace.

Allt worktables are designed for six to fourteen people, for workspaces where **the collaborative is as important as the personal**, and the casual valued above formality.

# Alone Together

All worktables support individual  
work in a team environment

In the **springtime of hybrid working**, the office needs to **add value, and exercise a magnetic pull** to justify the commute.

Within our Relationship Buildings research, we identified 12 design ideas key to the revival of prosperous work environments, and to creating better-connected experiences than the ones we're capable of having at home. 'Alone Together' tabling is one of these key ideas.

As we migrate away from the assigned personal desk, we gravitate to tables where we can work privately, but near to our colleagues. This proximity encourages spontaneous, informal interaction and collaboration, enabling ideas to be exchanged or refined without the rigidity, expectations and constraints of a formally timetabled meeting.

# effortless engagement

Allt worktables facilitate activity-based working, while **allowing effective, efficient work** away from the personal desk, and **encouraging the exchange of ideas.**

Supercharging connections between colleagues is now an organisations priority. In a recent report from *Gensler Research Institute (2023)* respondents to a global survey outlined that the number one priority when returning to work is to 'sit with my team'.

# Wood is good

Allt's solid oak frame is sourced from a carefully selected and managed  
**renewable forest.**

And, in our continued drive to make every Orangebox product as environmentally smart as can be, we have also endeavoured to keep the materials and processes involved in its production to the minimum.

The **Programme for the Endorsement of Forestry Certification** ensures that forest-based products being specified by our customers have been sourced from sustainably managed forests.

# treading lightly

From flexible architecture to task chairs, *Orangebox* are persistently striving to get the most out of a products' materials to have the least environmental impact possible. The design and engineering teams call this, 'more from less'. It's this philosophy that has allowed **Allt** to tread lightly in comparison to similar products in the marketplace.

Material efficiencies and packaging refinement have allowed **Allt** to significantly minimise its carbon impact.

A six-person worktable achieving a **carbon footprint of 71kgCO<sub>2</sub>e.**

People gravitate towards places with a **hand-made, comfortable feeling.**

Made from solid European white oak, the **Allt** table range is a companion product to the successful **BAE** collection of worktables.

Allt delivers the robust and durable performance demanded from large-scale collaborative tables, yet, thanks to a structure that's been consciously reduced to the minimum, succeeds in having a light footprint.

# refined leg architecture

**Allt's** refined leg architecture is designed to provide as much free leg space as possible, and is

---

a celebration of  
contemporary lines,  
natural wood and craft  
manufacturing.

Allt's large worktops are split in half lengthways, **facilitating manufacture, installation and reconfiguration** and creating a fresh design aesthetic.

This aesthetic finds an echo in the raised statement shelf, which conceals a convenient LED task light and is positioned to offer visual privacy at seated eye-level.

To deliver easy-access worktop power, the floor cable feed has been **concealed within the wood frame,**

ensuring the elegant and refined structure isn't compromised by unsightly cable risers.
